## Specific Vital Force Energy Pattern Balances the Lung Acupuncture Meridian as Demonstrated Using Motoyama's AMI Device

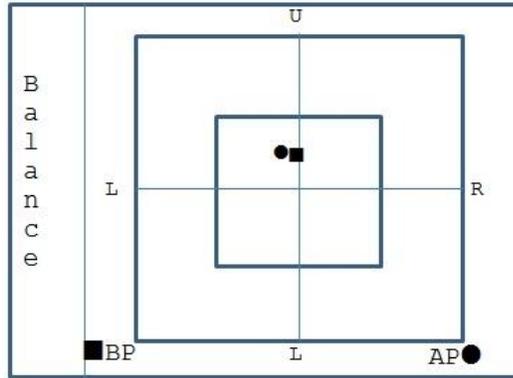

Tests Conducted at the California Institute for Human Science, 1998

The following tables and charts demonstrate the influence of a specific energy pattern with the "5 Elemental" qualities of Metal on balancing the Lung Meridian. The Lung Meridian is governed by the elemental properties of Metal. The test results were measured using an AMI device developed by Dr. Hiroshi Motoyama to measure the functioning of the acupuncture meridians and their corresponding organs. In the chart titled "Balance", the square dot indicates the level of balance of energy flow between the lower and upper parts of the body and between the left and right parts of the body.

**Table 1:** This table represents the baseline of the relative distribution of energy in the patient's meridians.

		Ave.		L.		R.		D.	
B		KI	0.91	SP	0.91	KI	0.92	HC	0.11
		UB	0.89	KI	0.89	UB	0.91	DI	0.08

		LI	0.72	LI	0.71	LI	0.73	ST	0.01

**Table 2:** This Table and chart indicate the improvement in the energy level of the lung meridian (LU) from a 0.78 Average to a 0.84 Average (an increase of 12%) after 2 minutes of exposure to a targeted energy with the 5 Elemental qualities of Metal. The balance between the upper and lower parts of the body was also improved as indicated by the square dot moving closer to the center of the graph.

		SI	0.80	TH	0.80	SI	0.80	LV	0.02
		HC	0.79	LV	0.80	LV	0.78	SP	0.00
		LV	0.79	HT	0.78	HC	0.74	SI	0.00
		LI	0.74	LI	0.75	LI	0.72	LU	0.00

Conclusion: Dr. Kronn has developed specific energy patterns based on the sophisticated array of qualities described in Traditional Chinese Medicine’s “5 Element Theory”. According to the principles and practices of TCM the Lung Meridian is governed by the Metal type energies. As indicated in this test the energy pattern of “Sliver Metal” produced an improvement in the energy level of the Lung meridian, working precisely as designed.
