

TPP™ HEAVY METAL DETOX

Most individuals have a level of lead and mercury in their body that is not compatible with optimal health. Research has estimated that over 50% of the U.S. population suffers from some form of heavy metal toxicity. Many of the heavy metals in the body result from the environmental contamination of industry. Other common sources of heavy metal toxicity include mercury from dental fillings, lead from pesticide sprays, solder in tin cans, and other metals from cooking utensils, cigarette smoke, contaminated fish, cosmetics, and antacids. Early signs of heavy metal poisoning, such as headaches, fatigue, muscle pains, indigestion, tremors, constipation, anemia, pallor, dizziness, and poor coordination, are vague and are often attributed to other problems. Although minimal heavy metal toxicity can still impair the ability to think clearly or have mental concentration, an abundance of research and information indicates that chronic heavy metal toxicity is a major problem in our modern society and its removal should be taken very seriously.

The abundance of possible problems and the severity of heavy metal toxicity has led to the creation of **TPP™ Heavy Metal Detox**. This formula is specially designed to bind with the heavy metals within the body and to help pull these toxins out of the body. The dangerous problem of heavy metal toxicity can be facilitated by eliminating the source of the toxicity and utilizing **TPP™ Heavy Metal Detox**. In addition to serving as a powerful chelating agent, this product will support the liver in its process of cleansing and detoxification and will replenish the body with minerals that are often depleted by these metals.

SYNERGISTIC FORMULA: TPP™ Digest

POSSIBLE INDICATIONS FOR TPP™ HEAVY METAL DETOX INCLUDE :

- Anemia
- Dizziness
- Fatigue
- Indigestion
- Muscle pains
- Pallor
- Poor coordination
- Tremors

POSSIBLE CONTRAINDICATIONS FOR TPP™ HEAVY METAL DETOX INCLUDE:

- Diarrhea
- Foul smelling breath, skin and urine
- Nausea
- Rapid detoxification

FORMULATION RATIONALE:

Vitamin C (Ascorbic acid): Use of this vitamin is the most effective method for raising the levels of the detoxification compound glutathione.

L-Cystine (HCl): This sulfur-containing amino acid and component of glutathione readily binds with and discards heavy metals.

Apple pectin: Heavy metals such as lead and mercury are excreted harmlessly through the bowel, utilizing this fiber carrier.

Sodium alginate: This derivative of kelp has demonstrated significant heavy metal detoxification abilities.

Kelp algae: This is an excellent source of minerals, iodine, potassium, magnesium, and iron that may have been depleted through heavy metal toxicity.

L-Methionine: This sulfur-containing amino acid readily binds with heavy metals and aids the liver in detoxification.

Chlorophyll: A nutrient with anti-inflammatory and antioxidant properties that has a heavy metal binding capacity, this also has excellent liver-cleansing and detoxifying properties.

Tzyme™ Protease Blend: This proprietary blend of protease aids in the lysis, targeting, and absorption of all plant-based substances.

SUPPLEMENT FACTS		
Serving Size 1 Capsule		
Amount Per Serving	% Daily Value	
Vitamin C (ascorbic acid)	125 mg	208%
L-Cysteine HCl	39 mg	*
Apple Pectin	30 mg	*
Kelp Algae	30 mg	*
Tzyme™ Enzyme Blend (Protease, Phytase, alpha-Galactosidase, Glucoamylase, Pectinase, Peptidase, Cellulase, Hemicellulase)	24 mg	*
L-Methionine	22.5 mg	*
Sodium alginate	22.5 mg	*
Chlorophyll	5 mg	*

* Daily Value not established
Other ingredients: gelatin, water.

Tzyme™ is a trademark of a proprietary blend of highly active, pH balanced, GI tract stable and functional enzymes formulated to enhance the digestive process and impart systemic benefits.

Each bottle contains 60 capsules.

Recommended Dosage: Take one capsule two times daily with food or as directed by your health care practitioner.

Tzyme™ Polysaccharolytic Blend: This proprietary blend of enzymes limits the inappropriate binding and removal of essential trace minerals from the body by oxalates and phytates.

The serious, widespread problem of heavy metal toxicity necessitates use of a serious, well-balanced nutritional product. The powerful nutrients in the **TPP™ Heavy Metal Detox** formulation are designed to help the body in its efforts to ease the metals out of the cells, provide the body with the minerals that are often depleted by these metals, and support the liver in its process of cleansing and detoxification. The addition of enzymes helps secure the absorption of the minerals and nutrients that are necessary for revitalizing and restoring the body to its optimal state of health and well-being.

These statements have not been evaluated by the U.S. Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent any disease.
